EXAMINER'S ACTION

EXAMINER'S RESPONSE

Status of Application.

1. In response to the applicant's amendment received on 3/27/96. The examiner has considered the new presentation of claims and applicant arguments in view of the disclosure and the present state of the prior art. And it is the examiner's position that claims 19-24,26-31,33-38 are unpatentable for the reasons set forth in this office action:

CLAIMS

2. The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as the specification, as originally filed, does not provide support for the invention as now claimed.

Specifically, the claimed definition of a cycle as comprising "a first period when the alert is generated followed by a second period when the alert is not generated," is not support by the specification as originally filed.

3. Claims 19-24,26-31,33-38 rejected under 35 U.S.C. § 112, first paragraph, for

the reasons set forth in the objection to the specification.

DOUBLE PATENTING

4. Claims 19,26,33 are provisionally rejected under the judicially created doctrine of non-obviousness-type double patenting as being unpatentable over claims 1,18,19,20 of U.S. application No. 220949 and claims 19,24,29,34 of U.S. application No. 220856.

The non-obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Schneller*, 397 f.2d 350,158 USPQ 210(CCPA 1968). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).

A two part test is applied to the claims. 1) is the subject matter recited in the claims of the application fully disclosed in the patent and covered by a claim in the patent. If yes, the second test is 2) is there any reason why applicant was prevented from presenting the same claims for examination in the issued patent (application) if the answer is no a double patenting rejection is appropriate.

Here, the subject matter recited in the pending claim is fully disclosed in the

applications referred above and covers the same subject matter covered by claims 1,18,19,20 of U.S. application No. 220949 and claims 19,24,29,34 of U.S. application No. 220856. Further, there was no reason why applicant was prevented from presenting the same claim for examination in the other application. The applicant has not maintained a clear line of demarkation between the above applications. Furthermore, the applicant appears to intend the above applications referring to the same subject matter since all have the same title.

5. Claims 21-25,28-32,35-39 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,18,19,20 of U.S. application No. 220949 and claims 19,24,29,34 of application No. 220856 in view of Breeden as discussed above.

6. The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Vogel*, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).
